

NeuroVoyager™ Pro Sport Lounger System

NLNCPS (non-commercial)

Much as today's concerts transport you into a journey of multi-media experience, NeuroEntrain Science, LLC's line of NES Voyager™ System products takes you on a symphonic voyage where the multi-media experience plays YOU as the musical instruments.

The synthesis of multiple entrainment technologies combined with aural / optical / tactile inputs to the brain and body are designed to synergistically give you a very rapid and smooth induction into the desired mind state.

Your mind and body are led on a journey into bliss while the multi modal symphony gently guides you to states such as sleep, deep relaxation, mediation, heightened awareness, memory enhancement, focus, etc.

NES's unique Entrainment Synthesis, based on years of published research data, is enhanced with our state of the art optional optical stim entrainment coupling system

NeuroEntrain™ Sciences, LLC

Each of our NeuroVoyager™ Pro Sport Systems comes with a special selection of NeuroVoyages designed for the pro athlete. These Voyages will take you into the world of deep relaxation, sleep, focus or meditative state. After a hard mentally and physically stressful day, you will appreciate the deep relaxation and feeling of wellness from the Voyager Systems.

Waking in the morning, the Voyages can allow you to feel and perform your best.

After an extensive workout or game the Voyages can restore your mind and body to a relaxed state – FEELING BETTER and RECHARGED!

The NES NeuroVoyager™ Pro Sport Lounger System is our newest system. It places you in a posture recommended by NASA from space research. This unstressed and relaxed position was found to place the musculoskeletal system in its most rested condition. The Lounger System is of a neutral / modern design that can enhance most rooms. While sleek in profile it accommodates the largest of athletes. Our embedded NeuroVibrational Arrays combined with audio and an optional optical stim entrainment coupling system guide the mind and body on a neuro entrainment voyage to beneficial altered states such as relaxation and stress reduction, focus, meditation, etc. This system has been ground up designed to deliver the most advanced neuro entrainment protocols combining most known technologies and pathways.

The system is comprised of the source player, control center, power and amplification center and embedded NeuroVibrational Arrays. This is enhanced with our optional optical stim entrainment coupling system that rounds out our entrainment system. All components are connected with professional couplings that give you the ease of use with high reliability.

The NeuroVoyager™ Systems gives athletes, patients and clients a more positive experience while undergoing treatment in the following categories / modalities:

- Relaxation & reduced stress
- Headaches
- Decrease experience of pain
- Neuromuscular re-education
- Calm /soothe restless behavior
